INTERVENTIONS Use the below codes to indicate whether the individual received the intervention as defined by your agency. (Note: The definitions for a given intervention may differ for the treatment and comparison groups. Thus, when using the codes, care must be taken to ensure that each value assigned reflects the individual's receipt of the intervention as defined for the individual's group membership [treatment or comparison]). If fewer than ten percent of juveniles in a group will receive the intervention as defined for that group, assign a code of "3" ("not part of program") to all individuals in that group.
